DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of the group II invention and the species of figure 6 in the reply filed on August 20, 2007 is acknowledged. The traversal is on the ground(s) that the search and examination of the entire application could be made without serious burden. This is not found persuasive because, contrary to what applicant suggests, the examination burden is not limited exclusively to a prior art search but also includes the effort required to apply the art by making and discussing all appropriate grounds of rejection. Multiple inventions, such as those in the present application, normally require additional reference material and further discussion for each additional invention examined. Concurrent examination of multiple inventions would thus typically involve a significant burden even if all searches were coextensive.

The requirement is still deemed proper and is therefore made FINAL.

Claims 1 to 9 therefore stand withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Drawings

The drawings are objected to for not complying with 37 C.F.R. 1.84(i) which requires that the plane upon which a sectional view is taken should be indicated on the general view by a broken line, the ends of which should be designated by numerals corresponding to the figure

number of the sectional view and have arrows applied to indicate the direction in which the view is taken.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because of the following informalities:

In paragraph 57, the sentence which commences in line 2 does not read grammatically correct.

In paragraph 62, line 1, "had" should read --has--.

In paragraph 65, line 1, "heat" should read --head--.

In paragraph 82, line 2, it is not understood what is meant by "blazing". Did applicant intend to recite --brazing--? See also paragraphs 83, 84 and 85.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 15 to 21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 15, lines 1 and 2 from the bottom, there is no antecedent basis for "the damping pipe". This renders the claim as indefinite because the structural relationship of the damping pipe to other structure of the compressor cannot be ascertained. Paragraph 2 from the bottom does not read grammatically correct.

Allowable Subject Matter

Claims 10 to 14 are allowed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The prior art could not be applied to claims 15 to 21 because the scope thereof cannot be ascertained, as explained above.
